

October 26-27, 2026, ICE Congress Centre, Kraków

MEGA SEKURAK HACKING PARTY

THE MOST SUBSTANTIVE IT SECURITY CONFERENCE

Up-to-date, practical knowledge that protects

Poland's top ethical hackers will demonstrate how cybercriminals really think. Participants will see live attack techniques and learn how to prevent them. This is essential knowledge that will pay off during a **real security incident** and protect against costly data breaches.

One ticket – 100 lectures...

Access to the **knowledge base** – Along with entry to the conference, Mega Sekurak Hacking Party participants gain access to archive editions of the event, providing additional lectures to expand their knowledge.

Management track

Led by experienced CISOs, **offering practical advice** and **real-world case studies** from Poland's largest companies. It is an ideal opportunity to exchange experiences, gain inspiration among leaders, and hear about the current challenges facing top Polish firms.

Networking and knowledge sharing

Opportunity to **consult your own processes and procedures** with top recognised experts and event participants – in a casual atmosphere.

Certificate of attendance and CPE credits

Certificate (in Polish and English) confirming acquired knowledge and competencies, certifying at least **15 CPE credits** (needed to earn and maintain professional certifications).

Motivation for growth and engagement

In addition to a solid dose of knowledge, we will also provide participants with genuine excitement! Contests and **CTF (Capture The Flag)** competitions are not only fun, but also a way to motivate development and reward engagement.

WHO IS IT FOR?

For IT and IT Security managers.

For corporate IT security specialists.

For developers, testers, and system administrators.

For anyone who wants to stay up to date with the latest threats and defence methods.

IT'S AN INVESTMENT IN BUILDING YOUR ORGANIZATION'S RESILIENCE

ROI (Return on Investment):

The conference will bring tangible benefits by **reducing risk**: acquired knowledge will help prevent costly incidents.

Innovation:

Understanding trends will allow you to implement new solutions that increase efficiency.

Reputation:

Attending a prestigious event strengthens your company's position as an organisation investing in growth and security.

Enhancing team competence:

Better protection for company systems, directly translating into **real security for the organisation**.

Building a competitive advantage:

A team with **current, practical knowledge** is your greatest asset in the market.

Strengthening resilience against upcoming attacks:

Better preparation and **risk minimisation** in the event of a security incident in the company.

Support for leaders:

Knowledge and experience shared during **management sessions** provide exclusive value not found in other events of this type.

Regulatory compliance

Regulations (such as NIS 2) increase the executive board's responsibility for cybersecurity, requiring documented skills enhancement and due diligence in **risk management**.

JOIN US AND INVEST IN YOUR COMPANY'S SECURITY!
