

CompTIA Security+ with sekurak

A genuine improvement in the IT team's skills,
backed by a market-recognised certification

CompTIA Security+ is one of the world's most widely recognised cybersecurity certifications. It is designed for IT professionals who need to master key IT security principles and implement them within their organisations.

What are the benefits for a company of having
CompTIA Security+ certified staff in its IT team?

- Practical enhancement of the team's skills in key areas of cybersecurity
- Raising the team's awareness of the serious consequences of safety negligence
- A significant reduction in the risk of losses resulting from potential cyber security attacks
- Compliance with the requirements regarding staff training obligations arising from regulations such as NIS 2, DORA, etc.
- Enhancing credibility with business partners in terms of data security
- Reduced dependency on costly external security consultants
- Boosting team motivation by providing opportunities for skills development and personal growth
